

All Work on the Rehab of the Door and Entrance to the Van Allen House Has Ceased!

Why?

Because the head of the Ramapo Conservancy and the boro of Oakland refuse to provide a temporary key to enable the completion of the door. All raw wood is now exposed to rot and decay.

A simple project has become the victim of obstructionism, indecision and bureaucracy. Shame on them!

And the Ramapough Conservancy wants our support?

They should first support their volunteers!
